

A photograph of a large indoor cannabis growing facility. The plants are arranged in long, neat rows, supported by a complex network of wooden and metal structures. The facility is covered with a translucent, green-tinted mesh or plastic, which filters the light. The overall atmosphere is clean and organized.

## Cannabis Growing Facility

---

## Protection from Rodents, Flies & Other Invaders

---

- Pest Control
- Quality Assurance Audits
- Customer Training
- PHD Level Consulting
- Emergency Response
- HACCP Development

We know the pest concerns associated with Canadian geography, climate and most importantly we understand the challenges of operating a Cannabis Growing Facility. We know the pests and how to protect your property and business from their often devastating effects.

HACCP Compliant Programs are what you need! With an Abell Pest Control customized HACCP program you can concentrate on other aspects of your operation because your pest control problems are now a thing of the past. Our friendly, highly-trained and experienced technicians will design a program that meets Health Canada Requirements based on your specific and unique needs.

**Join thousands of other successful businesses who depend on Abell Pest Control to pass audits, save crops, and ensure the safety of your staff, property and proprietary information.**
