

Cloths Moth Treatment

CLIENT PREPARATION FORM

For our company to provide the most effective service possible, we ask you to review and complete all the necessary steps listed below. The following steps will ensure that your technician is able to provide an effective and safe treatment.

How to Prepare for the Service

LIVING ROOM, BEDROOMS, CLOSET, ETC

Vacuum all rugs, carpet, and upholstered furniture. Discard vacuum bags immediately upon completion.

Any unlaundered wool or natural fibre clothing should be laundered or at least placed in a hot dryer for one hour. Follow all label recommendations before laundering.

Move all furniture 12" (30 cm) away from the walls. Please be sure to exercise safety first and do not attempt to move very large furniture.

Empty all closets that are experiencing the pest issue or signs of activity.

After the Treatment

The treatment will remain effective only if the following steps are taken after your home is serviced:

- ▶ Avoid waxing or washing floor surfaces, especially the edges for at least three weeks after treatment, and do not steam clean carpets.
- ▶ Vacuum as usual.
- ▶ **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products anywhere near spray treatments, as this will decrease effectiveness.

Reminder

- ▶ When a spray is applied inside your residence, you and your pets will be required to vacate the premises. Typically, a 4-hour window is sufficient. However, your representative will advise you at the time of service or leave an information notice at your premises if additional time is required.
- ▶ Upon re-entering, please open the windows for 20-30 minutes.
- ▶ Fish aquariums may be left on-site. However, they should be covered, and air filters disconnected.
- ▶ Persons with underlying health conditions should consult their family physician if they are concerned about re-entry time.

What You Can Expect from the Treatment

- ▶ Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician.
- ▶ These have all been strategically positioned to maximize their effectiveness. All treatments are made with your safety in mind to ensure your health.
